energy

The reasons for choosing DoubleCOOL doors are clear

Swing, pivot or roll your way in to sustainable fridge doors for your retail environment. Double up on quality, energy and cost savings by finding a refrigerator door solution that fits, perfectly.

doublecooluk.com

Welcome to Doublecool

A word from our Managing Director Sharon Harrison

At DoubleCOOL we are on a mission to fit fridge doors in retail environments. Not just any old doors, DoubleCOOL acrylic, double pane doors from the acrylic industry innovators.

One door at a time, one store at a time we're closing the gap on carbon emission targets. Keeping cold air in, assisting fridges to work optimally and cutting energy usage – sometimes by half!

It's not just our products that are working hard, our friendly attentive team do too. We see the job through from quotation to installation and are keen to be your fridge door solution partners.

Sharon Harrison

Managing Director - DoubleCOOL

Innovative market leaders

Today, Polyplastic BV and DoubleCOOL are owned by Lippert who have operations across Europe, including our manufacturing facility in Rotterdam and our 52,000 sq ft HQ and warehouse here at Uttoxeter, in the Midlands. Since launching DoubleCOOL in the UK back in 2022, tens of thousands of DoubleCOOL doors have been fitted in hundreds of shops and stores. We work with leading supermarkets, chain and independent convenience stores, petrol stations, farm shops, garden centres, post offices, universities and directly with refrigeration engineers to provide a durable, cost saving, energy reducing solution for chiller cabinets.

Our story so far...

DoubleCOOL's owners, Polyplastic BV were the innovators of formed acrylic back in the 1960s. Acrylic is safer, more transparent, and lighter weight than glass, which makes it ideal for automotive, construction and energy applications. For over 60 years Polyplastic acrylic glazing has been used in motorhomes, caravans and boats.

DoubleCOOL was founded as a new brand in 2014 as part of Polyplastic BV. Its mission, to introduce their latest innovation - lightweight double pane acrylic doors for refrigerated cabinets - to save retailers energy, lower their costs and their carbon footprints. Now working on solutions to help lower stock shrinkage.

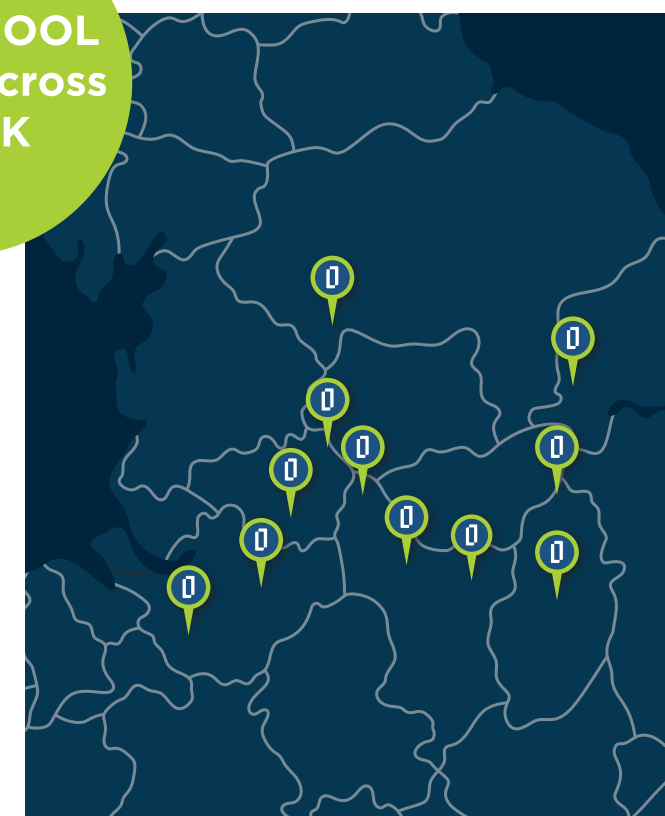

Here's why we're the UK's leading provider of acrylic fridge doors

- FORMED ACRYLIC INNOVATORS
- 60 YEARS OF EXPERIENCE
- UK WIDE SUPPLIER
- BESPOKE SOLUTION FOR EVERY CLIENT
- STRINGENT PRODUCT TESTING
- ACCREDITED INSTALLATION ENGINEERS

**DoubleCOOL

Installation excellence

DoubleCOOL is a Veriforce CHAS Accredited Contractor and is Alcumus SafeContractor accredited too. Not only do we manufacture and supply refrigerator doors, we see jobs through to full installation. With ultimate energy efficiency in mind, DoubleCOOL also install LED canopy lighting as part of the retrofit door chiller upgrade service. From our Midlands base, we've fitted out fridges as far north as Dingwall in the Scottish Highlands, to the west of Wales in Goodwick, Pembrokeshire, east Sussex at Saxmundham and down to the south coast in Brighton!

Why choose DoubleCOOL fridge doors?

DoubleCOOL is part of the Polyplastic Group, Europe's undisputed market leader in the design and manufacture of formed and cast acrylic products. We are innovators, with 60 years of experience and expertise. We supply energy efficient, double pane acrylic refrigerator doors to the best known supermarket chains, franchises, and corner shops.

We also work with refrigeration engineers to achieve ultimate energy efficiency solutions for retail clients.

Double the features

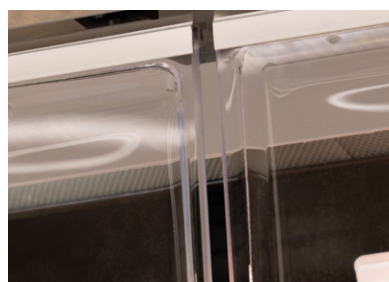

Transparent, robust and shatterproof

Formed acrylic is incredibly strong, crystal clear and resilient in use. Our sleek, frameless doors are tested to ensure that they provide long life even in the busiest of retail environments.

Easy to retrofit open chiller cabinets

You have our assurance that retrofitting your open chillers with DoubleCOOL doors will be simple. Our made-to-measure profiles and expertise ensure quick and unintrusive installation.

50% lighter than glass with zero maintenance

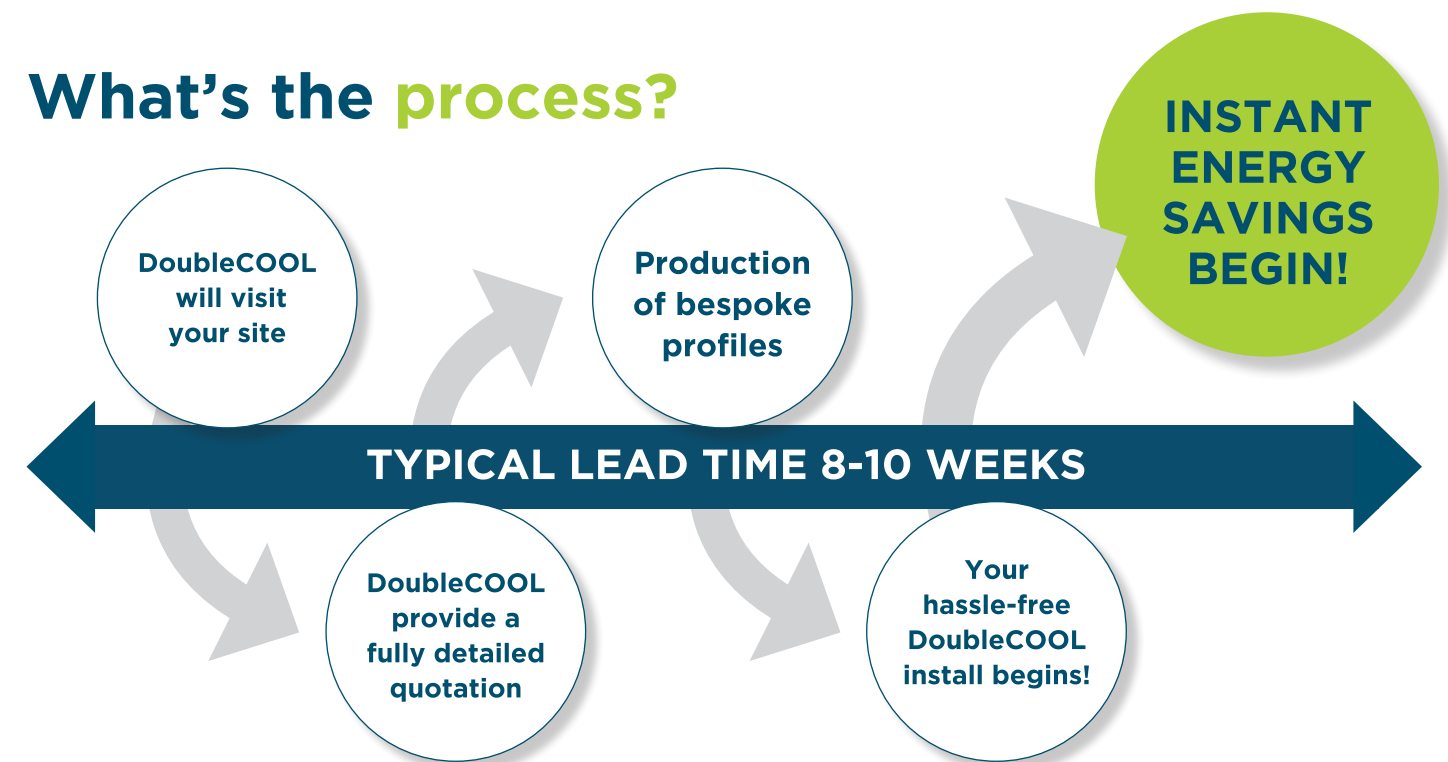

Our doors are double paned, but half the weight of glass. Incredibly lightweight and easy to operate. No maintenance is required, and the technical lifespan of the chiller is improved.

Doors open to 170° with soft close hinges

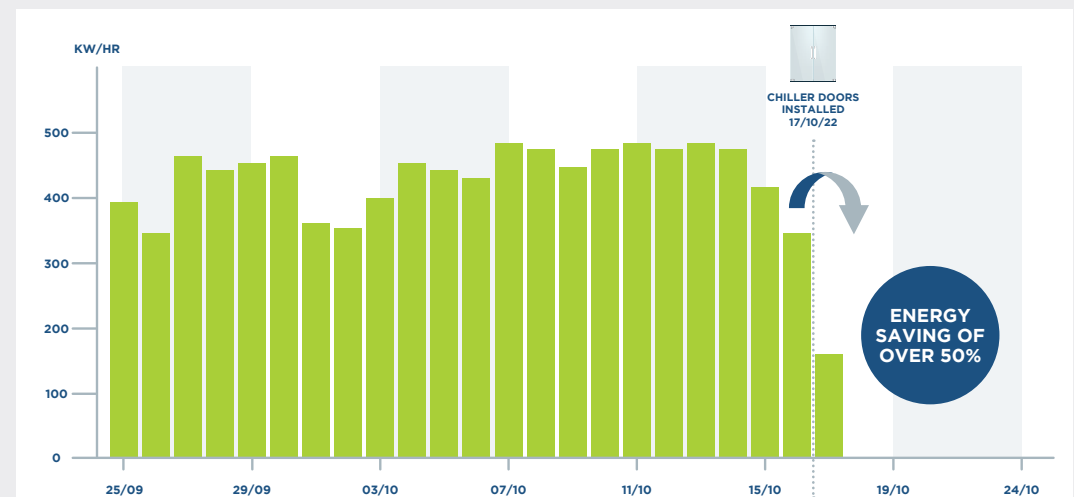

DoubleCOOL doors open wide for easy access and restocking. They also quietly self-close from 40°, with safety gap, soft close hinges and cushioned door stops.

What's the process?

An example of instant energy savings

mpk GARAGES

The graph illustrates the energy saving of over 50% achieved by MPK Garages after installing **DoubleCOOL** chiller doors.

Wayne Harrand, MPK Garage's Retail Director commented,

"Installation has gone smoothly at all sites, with no disruption to trading. We are now seeing consistent temperatures on the chillers, even in this summer's hot weather. By taking away the strain on the chillers and reducing the need for maintenance, we've also experienced better food quality and hence less food wastage. The results we've achieved with this cool move to enclose fridges, were a hot topic of conversation at a recent retail industry conference. We would highly recommend any retailer with open chillers to fit fridge doors. The reasons are as crystal clear as **DoubleCOOL** doors! It's a simple energy saving solution, good for the environment and has no negative impact on consumer spend. We've found shoppers are very supportive of the move, as they realise and understand what we are doing to provide a better consumer experience, save energy, and the environment."

SWING DOOR 1

Swing into instant savings with our most popular retrofit door solution

Open your eyes wide and take a clear look at the advantages of the DoubleCOOL Swing 1 Hinged Door. The perfect retrofit for chiller cabinet doors in supermarkets. Totally frameless, crystal clear transparency to show your chilled range off in its very best light. Wave goodbye to cold aisle syndrome and provide a comfortable, attractive shopping experience. Ergonomically upgrade existing refrigerator cabinets with sleek new doors for an improved look and energy performance rating.

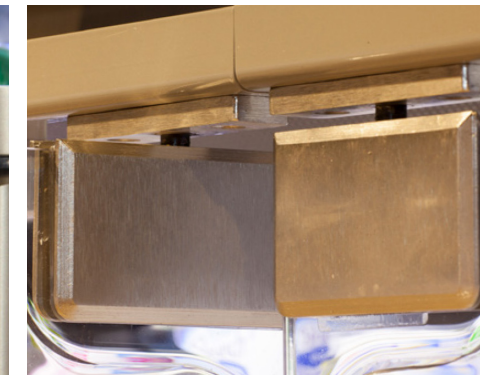

Swing Door 1 advantages

A small gap between the doors ensures finger safety.

Large grip stainless steel which are available with an antibacterial option.

A soft and quiet self-closing hinge system.

- Smoothly opening up to 170 degrees.
- 100% transparent.
- Retrofit to reduce energy costs by up to 60%.
- Unique double pane lightweight design.
- Self-closing hinges with safety gap.
- UV stable and condensation free.
- Robust, durable & maintenance free.
- Easy to install.

Retail Director, MPK Garages

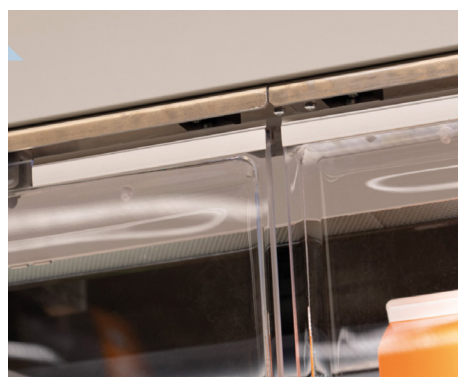

Choose made to measure Swing 2 Doors to fit your exact specification

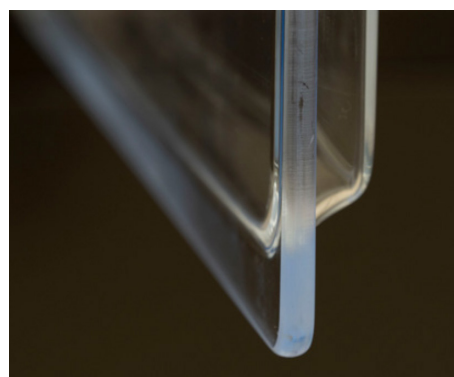

Find the cooler cabinet door solution to suit your store, your timeframe, your budget and your customers. When specifying completely new OEM refrigerated cabinets, DoubleCOOL's Swing 2 Hinged Doors are made-to-measure to fit your exact specification.

Swing Door 2 advantages

Slim design of the invisible hinge for maximum visibility of stock.

All corners on DoubleCOOL doors have soft round edges.

Smooth acrylic sheet with bonded handle.

- Smoothly opening up to 170 degrees.
- 100% transparent.
- Retrofit to reduce energy costs by up to 60%.
- Unique double pane lightweight design.
- Hydraulic self-closing hinges from 80°
- UV stable and condensation free.
- Robust, durable & maintenance free.
- Easy to install.

Rolling into supermarkets near you

Take a clear view of the advantages of DoubleCOOL Roll In Milk Doors. The fast-moving milk section loses a lot of energy when left open to the aisle, and leaves customers in the cold too. Prevent cold aisle syndrome and provide a comfortable, attractive shopping experience. Economically install Milk Doors and reduce energy costs by up to 60%. Lightweight, easily accessible and durable for constant customer use, with roll-in, roll-out access for staff to restock with ease.

Milk Door advantages

Roll In Milk Doors available with screen print, bumper and floor deflector system

Eradicates cold aisle syndrome

Strong, durable and lightweight doors with soft close for safety.

- Reduce your refrigerator's energy costs by up to 60%.
- Hinges are tested to over one million movements.
- Great access for shoppers and for stock replenishment.
- Proven not to impede milk sales.
- Smooth and easy opening.
- Self-closing hinges from 40 degrees.

Some testimonials from our happy clients

You'll find DoubleCOOL doors in leading supermarkets, convenience stores, post offices, farm shops, petrol stations and on university campuses.

chiller cabinets

Cheerbrook
Farm Shop & Café

Cheerbrook Farm Shop

"From our first communication through to the installation the whole experience has been faultless. We were looking for an energy saving solution to help our shop chillers hold their temperature. The doors we had fitted have far exceeded our expectations, and we can already feel the benefits both in our energy bills and in temperature control."

Megan Stacpoole

Administrator, Cheerbrook Farm Shop

12 DOORS INSTALLED
enclosing 7.5m
frontage of
chiller cabinets

Londis

Londis, Armitage

"I would like to thank Zoe for arranging the installation. All work done by the installation team, led by Dallas was done to a very high standard. I would recommend you and your company 'DoubleCOOL' to other customers. You were a great help from quotation to installation. Thanks for everything."

Charnjit Benning

Manager, Londis, Armitage

enclosing 7.5m
frontage of
chiller cabinets

Budgens

Budgens, Lechlade

"I came across DoubleCOOL at an ACS event. Wanting to review my energy efficiency in general, they sounded like the people to help me with retro fitting doors on chiller cabinets. An excellent service right from quote to installation. Very good standards of installation. The cabinets with retro fit doors on now look better than those that had doors on originally!!"

Ben Simons

Managing Director, Budgens, Lechlade

14 DOORS INSTALLED
enclosing 8.6m
frontage of
chiller cabinets

SPAR

Seafront Garage

"The DoubleCOOL doors we had fitted to our Spar shop performed exactly as promised and the company were a pleasure to deal with. Joanne was really efficient and did everything she promised, and Dallas, the engineer was not only extremely professional and competent but great fun to work with as well. I would highly recommend both the company and the product!"

Don Godfrey

Director, Seafront Garage

8 DOORS INSTALLED
enclosing 5m
frontage of
chiller cabinets

Londis

Chidwell Service Station

"Well what can we say!! This product is so good we came back for more! Zoe was, as previously, on the ball with everything and Dallas and his team did a fabulous job of fitting the doors. Has given a 20 year old chiller a new lease of life. Would highly recommend DoubleCOOL."

Chris Cundall

Manager, Chidwell Service Station

41 DOORS INSTALLED
enclosing 25.6m
frontage of
chiller cabinets

Costcutter

Brunel University

"DoubleCOOL doors have truly revitalized our chillers. The chiller temperatures used to fluctuate unpredictably, especially on hot days. Since the installation we've experienced remarkably stable chiller temperatures. Staff and customers have noticed that the doors help maintain a more comfortable temperature on the shop floor. The installation process itself was incredibly smooth, completed on time and to the highest standard."

Arnaud Leudjou

Head of Retail, Brunel University

50 DOORS INSTALLED
enclosing 31.75m
frontage of
chiller cabinets

Budgens

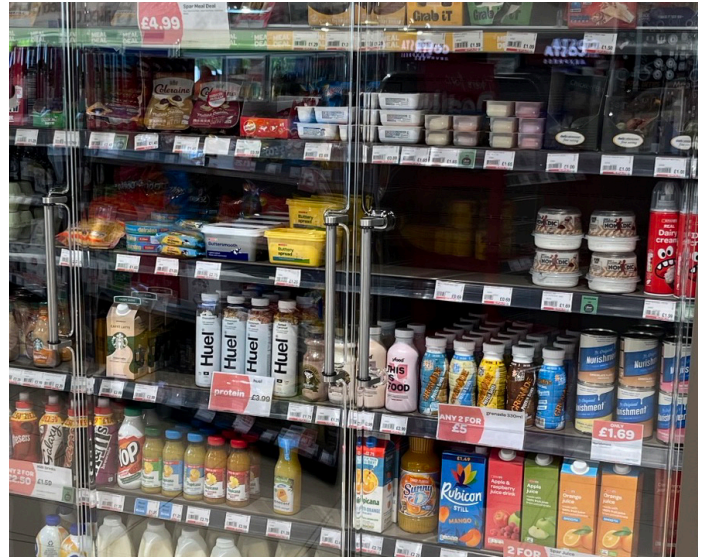

Budgens, Brighton

"The installation looks great and I could not have asked for anything better as they have transformed the overall ambient look of the store. Thank you once again it is highly appreciated."

Chris Edun

Owner, Budgens, Brighton
