DoubleCOOL
SUSTAINABLE COOLING SOLUTIONS

ROLL IN MILK DOORS

DESCRIPTION

Take a clear view of the advantages of DoubleCOOL Roll In Milk Doors. The fast-moving milk section loses a lot of energy when left open to the aisle, and leaves customers in the cold too. Prevent cold aisle syndrome and provide a comfortable, attractive shopping experience. Economically install Roll In Milk Doors and reduce energy costs by up to 60%. Lightweight, easily accessible and durable for constant customer use, with roll-in, roll-out access for staff to restock with ease.

DOUBLE UP ON ENERGY SAVING

DoubleCOOL refrigerator doors are great for the environment. Reduce electricity costs by up to 60%.

DOUBLE UP ON QUALITY

We invented unique, high quality, lightweight, double pane acrylic cabinet door solutions.

DOUBLE UP ON VISIBILITY

Frameless, condensation free, UV stable fridge doors that will show off your produce in the very best light.

Roll In Milk Doors available with screen print, bumper and floor deflector system.

Eradicates cold aisle syndrome.

Strong, durable and lightweight doors with soft close for safety.

AVAILABLE DIMENSIONS

ROLL IN MILK DOOR	460 x 1900mm 490 x 1900mm	490 x 2003mm 615 x 1841mm	490 x 2045mm 525 x 2003mm	525 x 2045mm

NEW

Easy to construct with new refrigeration cabinets working in collaboration with manufacturers. Typically cost saving.

RETROFIT

We stock many common size refrigerator doors but we can also manufacture a bespoke size door too. As acrylic is typically 50% lighter than glass it's an easier, safer and cost efficient alternative.

INSTALLATION

After a site visit, we will confirm your exact refrigerator door requirements, either a stock item or bespoke model. Installation is precise, swift and carried out to suit your business, causing minimum disruption and ensuring you keep the doors of your business open. Where possible we will work collaboratively with your maintenance team and refrigerator engineers to minimise installation inconvenience.

FEATURES AND BENEFITS

- Reduce your refrigerator's energy costs by up to 60%.
- Milk door hinges and door stoppers are adjustable to fit your milk area.
- Hinges are tested to over one million maintenance-free movements.
- Great access for shoppers and for stock replenishment.
- Proven not to impede milk sales.
- Smooth and easy opening up to 170 degrees.
- Self-closing hinges from 40 degrees, with a 15mm safety gap.

ENERGY SAVING

DoubleCOOL Roll In Milk Doors are great for the environment saving energy and 100% recyclable. They are proven to reduce electricity costs by up to 60% compared to open cabinets. Improved temperature distribution reduces food waste and improves the technical lifetime of the refrigeration system.
